Introduction. The education system is one of the important factors in determining the development of society and the future. This is not only in the process of preparation of future teachers in regard to knowledge and skills, the skills you will need, but also plays an important role in the formation of professional culture. Professional culture - this is the professionalism of the teacher, teaching a creative approach to the learning process implies the combination of effective communication and the ability to receive. In the present day continues to require the introduction of modern technologies in the education system reforms. The professional skills of teachers in this process in the future the form and modern technology have become topical issues of the development of effective new year. His personal success to the professionalism of not only teachers, but also the quality of education and also the development of knowledge of the borrower has a direct effect. Modern education system in front of highly qualified, professional teachers will stand as one of the urgent tasks for the preparation of culture. The process of education to give not only theoretical knowledge, but also in the future should be focused on the formation of professional culture of teachers and kompetensiya. The transmitter of knowledge not only teachers, but also the form of the personality caregivers also. Therefore, the professional culture of the teacher of teachers, physical, intellectual and spiritual development plays an important role.

Today, to enhance the professional skills of future teachers towards being seen as the most pressing problem, and sufficient conditions for it are being created. The professional culture of future teachers to increase them is one of the most important factors in the preparation of pedagogical and psychological aspects. To do this, create adequate conditions in higher education institutions, and also many research is being conducted. We prepare students for the leading specialist in any field we primarily about the culture of professional knowledge, skills and qualifications in the form of it is necessary.

In this article, the formation of the professional culture of the future teachers in technology, the main stages of this process, as well as advanced methods of analysis have been the use of technology. Maqasad - higher pedagogical skills of the teacher in the future, you have to prepare educational and

didactic tasks that can effectively solve as the leading expert to assist you.

Teachers professional skills of complex, multifaceted and versatile features, representing the order of the society, which corresponds to their own instead of having prepares and pedagogical personnel and social-pedagogical phenomenon.

Teachers who have professional skills - this integrated fundamental knowledge, summarize oriented skills, teaching ability, an important personal and professional qualities, skill and civilized, self-action are aimed at continuous improvement of the quality of the containing collection.

The professionalism of teachers who respond to certain social order of the society of reflecting the interaction of the various components of the education system which are associated with the specific feature. The professional skill of teachers of the components are the following:

- the level of general culture;
- psychological and pedagogical kompetentsiya;
- the ability to achieve set goals and objectives;
- pedagogical thinking ability;
- ability to carry out innovative activities in the field of education

Analysis of the literature on the subject: the pedagogy and psychology of the formation of the professional culture of future teachers in the sciences of the issue widely studied within one of the priorities is important. The professional culture of the teacher in shakllantrishda the theoretical foundations of the research, technology, and wide range of practical approaches review. The activity of students in pedagogical higher education institutions to prepare them to my formation and management of etiquette and professionalism in the educational process is carried out. Because future teachers-teaching staff is considered very important that you know my rules of etiquette today. In this regard, the republic of uzbekistan "on the status of teachers", and in article 8 of the lawedagogik his ethics rules, the rules that one must follow in the process of fulfilling professional obligations majbriyatidan the fact that you have them, complete teachers of the discipline of defining the criteria for quality indicators and labor and this is the basis for disciplinary violation of rule that can be given, showing in particular responsibility to be pulled into

1. The concept of professional culture and its components.

Many resources professional pedagogical culture of the teachers of theoretical knowledge, methodological skills, is interpreted as the sum of personal and social values. In particular, the main components of the professional culture of work and Shumakova n. a. N. A. Davydovaning-kompetentsiya communicative, creative and ethical norms is important fiklash shows.

Result and discussion.

In this article, on the basis of digital technologies with the potential for the development of teachers ' professional kompetentlik and educating the teachers on the content and status of the studies available through this.

The three main pedagogical aspect of the activity is the following:

The person	teaching the activity of	Pedagogical communication of
the personality of teachers in the pedagogical and pedagogical professional level communication defines his activities.	Pedagogical activity - pedagogical work of "technology", pedagogical communication - climate and the environment this work, personality - these values, ideals, from the internal sense of the work of teachers.	Kompetentsiya professional development of teachers in this activity refers to all aspects of the form of these three.

Each aspect of pedagogical activity includes the following components:

Professional psychological-pedagogical knowledge of	teachers' professional knowledge - the science of pedagogy and pedagogical psychology of the essence of the work, teaching and communication features, the teachers, the personality of the mental development of the child, their age and information about other features. Professional knowledge of teachers in the structure. The necessity of this knowledge for his personal professional development.
Professional teaching skills	and pedagogical skills -these teachers' pedagogical actions (effects). Like all other skills, pedagogical skills are also trying fulfilled at a high enough level. Pedagogical skills of teachers to "technical" shape.
Professional psychological-pedagogical knowledge, and	professional psychological bounce - this teachers (student herself, colleagues) is a stable system of relations, determines its behavior. Professional status, as well as professional self-honor, the level of teachers ' professional aspirations, who occupy in the system of social relations and claim instead of attitude in the school represents.
The position of professional psychological, pedagogical relationship	of professional motivation level of teachers, their work is closely related to understand the meaning of.
To ensure that teachers possess professional knowledge and skills and personal features of the event	Intiliuvchalik, hard-working interest ijorkorlik, the aspiration to know the updates on their field, to get acquainted with the advanced experience in the field of go.

Currently, in the literature many exactly the professionalism, many opinions have been expressed about the culture of the profession. To master any profession, first of all, love the professional, are formed on the basis of the feeling of patriotism. Like this a different form in each of the younger generation appearances, but we teachers about the professional culture of future teachers in and we need to deliver on the organization of concepts through the most acceptable methods.

Conclusions and recommendations (Conclusion/recommendations).
