**Keywords:** just society, world economy, legal awareness, legal culture, level of corruption, "Development Strategy" Center

### **INTRODUCTION**

From January 4, 2017 to force entered "Corruption against struggle about" Uzbekistan Republic In law to corruption so definition given: "corruption is a person's own career or service from the position personal interests or other of persons interests aiming material or intangible profit to take for the purpose of to the law conflict in a way use, like as well as such profit to the law conflict in a way present verb". Simpler in other words, corruption is the state in their offices working of persons own from practice using, private interests everyone from something pillar for a bribe sales or sell acquisitions, illegal material or intangible wealth are their gains.

Current globalization time, regions and interstate integration is gaining momentum going complicated one Corruption in all circumstances in countries both row problems bringing out, society from the inside decayed and in disarray as throw danger is putting Therefore, today big or small, rich or poor, powerful or weak some the state corruption - free area, we can't say. UN and of the International Monetary Fund to the information according to the world economy due to corruption up to 1.5-2.6 trillion dollars per year damage is watching.

Therefore in our country to corruption against sharp and uncompromising struggle take is going In particular, "To corruption against struggle "about" The law reception to be done as well Corruption against struggle inter- departmental republic commission organization being and to corruption against struggle of the State program confirmation with corruption in our country related of offenses ahead to take directed row measures effective to do increase provided. An example for short time inside to corruption against of struggle legal mechanisms to improve due five normative and legal document, including "Legal information distribution and from it use provision about", "Administrative procedures about", "Public control on", "State procurement "about" laws reception was done.

Our President "In Uzbekistan," which was signed yesterday to corruption against struggle system further improvement "about" Decree this about consistent of effort logical continuation from this intended main purpose in our country to corruption against struggle system efficiency further increase, most high at the level convenient investment and entrepreneurship environment creation of

the country international on the field positive image increase and to strengthen directed.

This Decree with in 2019-2020 to corruption against struggle state program reception Corruption against struggle inter- departmental republic commission updated composition approved.

In the decree to corruption against struggle in the field state of the policy dominant directions both by designating given Including the judiciary independence further strengthening, to the judges every what in a way to the law conflict in a way impact transfer conditions exception verb, state employees choice based on selectively to take, to the position appointment and high to positions of lifting transparent in order based state service system formation , state servants declaration of income system step by step current with corruption related offenses informed about persons protection to do effective organizational and legal mechanisms current verb , in society to corruption relatively uncompromising the relationship strengthen, state bodies and organizations accountability and of activity transparency increase, citizenship society institutions , public information tools of activity really freedom provision and them to corruption against measures preparation , conducting and in monitoring its performance participation to do attraction to do like issues these including .

From now on since departmental to corruption against of struggle effective programs to do increase their accountability and of activity openness mechanisms current manners , manners to the rules compliance being and interests of the collision got to be taken provision according to practical measures to perform through relevant in the field to corruption due to offenses possibility creating reasons and conditions vein with loss state bodies and organizations of the leaders first at the level important task considered It happened .

Now , more precisely from July 1 , 2019 starting state bodies own on their shoulders loaded task and functions to do in progress to the surface threats of corruption from time to time with mandatory in a way appreciate they go it is necessary If the state management and local execution doer authority bodies leaders of the dangers of corruption own on time if they don't specify and relevant price if they don't give , also to corruption due offenses repeatedly happened verb to the circumstances road if they put it , personally responsible They will be .

To the decree mainly for three months certain in the category state of servants property and declaration of income system step by step current verb according to proposals work discharge necessity marked . Current from August 1 of the year as an experiment , the public and leader including foreign experts experts attraction did in case initial capital construction in stages and supreme education in the fields of " Corruption-free industry » project to do increasing It happened . This project from April 1 , 2020 starting other to sectors both step by step current being in view is being held .

Decree with reception made in 2019-2020 to corruption against struggle of the State program "Population legal conscious and legal culture promotion in society to corruption relatively uncompromising the relationship formation named in the direction of designated measures to do in increasing "Progress strategy " center both row organizations in cooperation participation verb marked. In particular:

- happened being pushed to corruption due of crimes to oneself characteristic scheme to study based on of corruption typology to create;
- corruption inclined was sectors determination based on networks in the section to corruption due maps to create;
- corruption due offenses happened of the terms and conditions and reasons study as well them elimination verb suggestions work exit;
- corruption against struggle in the field reception being done of measures efficiency assessment;
- corruption against struggle in the field education and research institutions scientific

employees, including international from organizations to corruption against struggle in the field research transfer according to grants attraction to do through assistance;

— level of corruption, corruption perception verb and personal experience as well as the state authority to the institutions confidence and to corruption against measures effect level assessment for the purpose of public his opinion to study according to research organization to do in his work Our center initiative showing, active participation verb in view is being held .

this purpos, "Progress strategy" center by separately measures plan based on activity take It will go to him . according to corruption take underlying causes exactly analysis make , the root of corruption shooting possible was sectors about population and official persons regularly alert meat go , the population , especially the youth legal literacy increase , among them to corruption against struggle culture shaping main task is considered . in turn , the population various layers between , as well as the state bodies and of entrepreneurs Face- to-face meetings are open their conversations transfer, foreign of states to corruption against effective struggle experience learned, acceptable aspects in ourselves application verb , this on the way deep analytical research their work on the road to put and their to the results leaning in case to corruption against of struggle effective methods work out , relevant suggestions preparation and responsible to the offices present to do Center of activity dominant in the direction of It will rotate. Thus together, wide of the public to corruption was views and attitude negative towards change on the way public information tools with cooperation their connections fundamentally improvement and reinforcement to the issues first next task as We approach.

Indeed, in society to corruption relatively uncompromising the relationship shaping today on the day extremely current issue is , this about not only responsible offices, rather wide public both together and like-minded to be to the goal is appropriate . From this come out, somewhere bribery, bribery to the circumstances shower as for you , everyone one of us this unpleasant to the event relatively indifferent not to be , indifference If we don't do it , on the contrary , the evil of corruption tag vein with to dry directed efforts conscientiously to perform our entry duty and our responsibility roundabout necessary . Otherwise when expressed, to injustice relatively uncompromising to be from ourselves our beginning necessary. Because this about every one citizen right legal basically strict guaranteed. That is, "To corruption against struggle about In law physical and legal of persons to corruption due crime to the facts circle requests completely, objectively and own on time seeing output, corruption due offenses about information gave persons protection to be done by designating placed.

In addition , in 2017-2021 Uzbekistan Republic development five dominant direction according to Actions " Active " strategy investments and social development in the year to do to increase in the State program in view caught of corruption ahead to take and to him/her against of struggle effective mechanisms creation from the measure intended final purpose both World of the bank " Business management » ranking 2020 final according to all in directions Uzbekistan instead fundamentally improve the reputation to increase directed . Of this for other sectors as well as corruption end to give both important importance profession Because any one to the state investment input at will the investor who is the most first of all, that in the state investment climate stability, creating given conditions, opportunities and of course legal to guarantees is interested.

That in the state cases of bribery, embezzlement, corruption road He decides to invest only if it is not allowed. So to corruption reason happening the circumstances and society this from trouble rescue issue discussion on the road to put and this about wide public, international the community informed as to go current to the point have Consequently, our economy further fast promotion, our people prosperity increase the investment environment in our country improvement regarding strategic tasks solution verb directly to corruption against struggle in the field state of the policy effective to do increase with circle It depends. purpose on the way all of us our union, one let's get out of the way,

together and like-minded to corruption against struggle according to to do being carried out state policy not only Our support is in it active participation let's do it today of the era himself request what is being done let's not forget condition and necessary.

### **Methodology**

The methodology of this study is based on a comprehensive analysis of legal frameworks, national strategies, and governmental efforts to combat corruption in Uzbekistan. It utilizes a qualitative research approach, focusing on reviewing and interpreting primary legal documents, including laws, decrees, and state programs related to anti-corruption measures. Key sources include the "On Combating Corruption" law, presidential decrees, and other relevant legislation.

The research also incorporates an analysis of secondary data, such as reports from international organizations like the United Nations and the International Monetary Fund, on the global impact of corruption. Additionally, the study examines the legal culture, public awareness, and the effectiveness of anti-corruption measures through case studies and evaluation reports of ongoing programs.

This mixed-methods approach enables a deep understanding of the mechanisms at play in Uzbekistan's fight against corruption and highlights the practical application of legal reforms, while also offering insights into the challenges and opportunities for further improvement in this area

### **Results and Discussion**

The implementation of anti-corruption laws and strategies in Uzbekistan has led to noticeable improvements in addressing corruption. The introduction of new legal frameworks, such as the "On Combating Corruption" law, and the establishment of the State Program have enhanced the country's ability to combat corruption through more transparent processes and stronger accountability measures. The legal reforms have fostered greater public awareness and strengthened legal culture, which has begun to shift societal attitudes toward corruption.

However, challenges remain, particularly in ensuring the effective enforcement of anti-corruption policies and improving the overall legal literacy among citizens. While the state has made significant progress, the persistence of corruption in certain sectors shows the need for continuous vigilance and further institutional reforms.

In conclusion, the fight against corruption in Uzbekistan requires ongoing efforts to enhance legal mechanisms, promote public engagement, and strengthen the capacity of governmental bodies to implement anti-corruption policies effectively. The establishment of a robust anti-corruption culture is critical to creating a more just society and improving the nation's global image.

### **Conclusion**

In conclusion, the fight against corruption in Uzbekistan is a critical part of creating a just and fair society. The country has made significant strides through the implementation of comprehensive anti-corruption laws and strategies. These efforts have contributed to greater transparency, improved public awareness, and strengthened legal culture. However, challenges remain in fully eradicating corruption and ensuring that all sectors follow these new legal frameworks effectively.

The development of a strong anti-corruption culture, combined with continuous efforts to improve legal literacy and accountability, will be essential for long-term success. The active participation of both government institutions and citizens is necessary to create a corruption-free environment. Ultimately, building a just society requires persistent efforts from all levels of society to combat corruption and promote integrity in every aspect of life.
